

Oil-Free Direct Drive Air Compressor with 24L Tank

This oil-free air compressor features a direct drive motor and a 24-liter tank. It provides compressed air for a variety of pneumatic applications.

Product Overview

The compact 24L design ensures easy mobility for professional and DIY tasks.

High-Efficiency Oil-Free Air Compressor

This 24L direct-drive air compressor provides a reliable and clean air supply, making it an excellent choice for workshops and DIY projects. Its maintenance-free, oil-free design ensures clean air output and reduces long-term service requirements. Built with an aluminum cylinder head for superior heat dissipation, the unit also features a thermal protection system to guarantee safety and durability during extended use.

Technical Specifications

Equipped with easy-to-read pressure gauges and integrated regulators.

Voltage & Frequency

- 110/220V
- 50/60Hz

Motor Power	900 W
Tank Capacity	24 L
Maximum Pressure	8 bar
Max Air Flow	179 L/min
Rotation Speed	2650 rpm

Physical Attributes

Size and Weight

25 kg

Weight

56 cm

Length

Features

Aluminum cylinder head designed for improved heat dissipation.

Core Features

Oil-free, Direct Drive, Thermal Protection, Portable, Aluminum Cylinder

Package Options

Available Packaging

Kraft box (Standard) • Color box • Plywood box • Honeycomb box
