

Oil Press Machine

This oil press is designed for extracting oil from various oilseeds. It features a sturdy frame and a feeding hopper for continuous material input.

Overview

Robust Oil Extraction Solution

The 6YL-68 oil press is a robust and efficient machine engineered for extracting oil from a wide variety of oilseeds. Designed with a sturdy frame for maximum stability during operation, it features a continuous-feed hopper that simplifies the production process. Its large pulley-driven mechanism ensures consistent pressure, delivering optimal oil yield for small to medium-scale operations.

Technical Specifications

Operation Mode

Manual

Key Design Features

- Sturdy frame for stability
- Continuous material feeding hopper
- Large pulley-driven pressing mechanism
- Simple, durable construction

Model Number

6YL-68

Performance

Suitable Scale

Small to medium-scale
