Product Overview

Professional Oilfield Lifting Equipment

The Traveling Block is an indispensable lifting component engineered specifically for oilfield drilling rigs. It is designed to facilitate the efficient and safe lifting of critical hardware, including swivel and top drive assemblies. Built for reliability in demanding drilling environments, this equipment ensures smooth vertical load handling for various rig configurations.

Technical Specifications

Compatibility

- Compatible with various drilling rig types
- Engineered for wire rope operation
- Supports heavy-duty drilling loads

Primary Applications

Oilfield Drilling, Swivel Lifting, Top Drive Lifting, Drilling Floor Operations

Quality & Design

Design Features

Heavy-duty construction • Robust sheave system • High-strength materials • Precision load handling
