Product Overview

Reliable Electrical Control

This one-gang, two-way toggle switch is engineered for consistent performance in residential and commercial environments. Designed to control a single light or circuit from two distinct locations, it features high-quality silver alloy contacts that resist electric arcs and melting. The durable construction ensures longevity, with the mechanism tested to exceed 40,000 on-off operations for dependable daily use.

Technical Specifications

Operating Life

40000 cycles
Operations

Terminal Configuration

- COM (Common)
- L1
- L2

Voltage Rating

250 V

Material & Quality

Contact Material

Silver Alloy

Socket Material

Phosphor Bronze

Compliance & Standards

Certifications

CE, CB, BS, SASO, GOST, RoHS
