Overview

Compact Performance for Water Transfer

The FST-25AW is a versatile one-inch gasoline engine water pump engineered for reliable performance in irrigation, drainage, and general water transfer tasks. Built with a robust metal housing and mounted on a sturdy frame, it ensures stability and durability in agricultural, construction, or domestic settings. Its portable design and gasoline-powered engine make it an ideal choice for operations in remote locations where efficiency is required.

Technical Specifications

Operational Warnings

Do not run dry • Avoid dry running

Port Size	1 inch
Key Features	Self-priming, Portable, Gasoline-powered, Durable Frame

Applications

Suitable Applications

- Agricultural irrigation
- Construction site drainage
- Domestic water transfer
- General fluid pumping
