

One-Way Flow Control Check Valve

This check valve allows fluid to flow in only one direction, preventing backflow. It is constructed from durable metal and features a threaded inlet for secure connection and a compact design.

Overview

Reliable One-Way Flow Control

This check valve is engineered to allow fluid flow in only one direction, providing a dependable solution for preventing backflow in critical systems. Constructed from durable metal, it is built to withstand the rigors of industrial environments while maintaining a compact footprint. The threaded inlet ensures a secure and stable connection, making it an ideal choice for space-constrained installations.

Technical Specifications

Design Features

Compact Design • Secure Connection • Backflow Prevention

Flow Direction	One-way
Material	Durable Metal
Connection Type	Threaded Inlet

Applications

Recommended Applications

- Plumbing systems
- Industrial fluid control
- Backflow prevention setups
- Tight-space installations
