

Online Uninterruptible Power Supply (UPS)

This online UPS provides reliable power protection for critical equipment. Double-conversion technology ensures a stable and clean power supply, safeguarding against voltage fluctuations, surges, and blackouts.

Overview

FR-UK33 Series Online UPS

The FR-UK33 series Online UPS is designed to provide reliable power protection for critical equipment. Utilizing advanced double-conversion technology, it ensures a stable and clean power supply, effectively safeguarding sensitive electronics against voltage fluctuations, surges, and blackouts. With built-in remote management and monitoring capabilities, this system is an ideal solution for data centers, server rooms, and other mission-critical applications.

Technical Features

Protection Against

- Voltage fluctuations
- Power surges
- Blackouts

Technology Type	Double-conversion
Suitable Applications	Data Centers, Server Rooms, Sensitive Electronics

Management

Monitoring & Control

Remote Management • Proactive Maintenance
