

Oscillating Multi-Tool with Variable Speed

This oscillating multi-tool is a versatile power tool suitable for cutting, sawing, sanding, scraping, and grinding applications. It features variable speed control for optimal performance on different materials and a tool-free accessory change system for quick blade swaps.

Overview

Versatile Oscillating Performance

This oscillating multi-tool is engineered for precision and versatility, making it an essential addition to any professional toolkit. With a 300W motor and variable speed control, it handles diverse tasks including cutting, sawing, sanding, and scraping with ease. The quick-change accessory system minimizes downtime, while the included dust extraction assembly helps maintain a cleaner workspace.

Technical Specifications

Power Input

300 W

Power

Voltage	230V
Frequency	50 Hz
No Load Speed	15000 - 21000 rpm
Oscillation Angle	3 °

Features

Key Features

Variable Speed • Quick Change System • Dust Extraction Port • Soft Grip Handle

Included Accessories

Included Items

- 1pc HSS segment saw blade
- 1pc HCS metal cutting blade
- 1pc HCS scraper
- 1pc Delta sanding pad (90x90x90mm)
- 3pcs Sand paper (80/120/240 grit)
- 1pc Dust assembly
- 1pc Handle
