

Outdoor LED Flood Light

High-performance LED flood light designed for outdoor illumination. It is encased in a robust, weatherproof housing with an IP65 rating for protection against dust and water ingress.

Overview

High-Performance Outdoor Illumination

This high-performance LED flood light is engineered for reliable outdoor illumination in demanding environments. Featuring a grid of high-intensity LED chips, it delivers uniform light distribution across large areas such as parking lots, building facades, and security perimeters. The unit is encased in a robust, weatherproof housing, ensuring durability and consistent performance.

Technical Specifications
