Overview

Sustainable Outdoor Illumination

This outdoor LED solar pole light offers a self-contained, energy-efficient lighting solution designed for public and private spaces. By utilizing an integrated solar panel for daytime charging and a high-capacity battery for nighttime power, it provides reliable illumination without the need for external electrical grids. Its durable construction ensures resilience against various outdoor environmental conditions, making it an ideal choice for streets, parks, and pathways.

Technical Specifications

Core Components

- Integrated Solar Panel
- Rechargeable Battery Storage
- High-Efficiency LED Lamp
- Curved Mounting Arm

Suitable Applications

Street Lighting, Pathway Lighting, Public Parks, Area Lighting

Design & Durability

Environmental Durability

Weather Resistant • Outdoor Rated

Installation

Pole-mounted with curved arm for wide area coverage
