

# Outdoor Solar Security Light with Motion Sensor

This outdoor security light is solar-powered. It has a motion sensor that automatically activates the light at night.

## Product Overview

### Solar-Powered Security Illumination

This outdoor security light provides an energy-efficient and cost-effective lighting solution for various exterior environments. Equipped with a built-in solar panel, the unit automatically recharges during daylight hours and utilizes an integrated motion sensor for reliable activation after dark. Built with durable, weather-resistant materials, it is ideally suited for securing and illuminating pathways, entrances, and perimeter areas.

## Technical Specifications

### Primary Benefits

- Automatic night-time activation
- Energy-efficient operation
- Cost-effective design
- Durable outdoor construction

<b>Power Source</b>	Solar Energy
<b>Sensor Type</b>	Motion Sensor
<b>Environmental Resistance</b>	Weather-resistant, Outdoor-rated
