Product Overview

High-Velocity Overhead Fastening System

This overhead ceiling gun is a professional-grade tool designed for efficient fastening in construction and installation projects. It significantly increases productivity by eliminating the need for hammer drills, anchor bolts, electricity, and ladders, allowing for installation in a single shot. The system is compatible with various materials, including high-grade concrete and steel, making it ideal for ceiling, insulation, and partitioning applications.

Key Performance Metrics

Performance Specifications

450 J

Impact Force

3.2 kg

Weight

50000 shots

Minimum Lifespan

Technical Capabilities

Material Compatibility

- High-grade concrete (C30, C40, C50, C60)
- Steel up to 12mm thickness
- Light steel keel
- Wood keel

Fastener Specifications

Feature	Specification
Pin Lengths	25mm - 60mm
Pin Material	C1065 High Carbon Steel
Core Hardness	HRC54/59
Shear Strength	8.0 KN
Plating	Mechanical Zinc

Certifications & Standards

Quality Standards

ISO 9001, CE Approved

Application & Usage

Primary Applications

- Pipe and lamp suspension
- Air-conditioning pipe and hose fixing
- Cable tray installation
- Floor heating fixing
- Suspended threaded rods and steel wires
