

Pan Head Chipboard Screw

This pan head chipboard screw is designed for secure fastening in chipboard and composite materials. It features a wide pan head for increased surface area and holding power, along with a sharp point and deep threads for easy insertion and strong grip.

Product Overview

Professional Grade Fastening Solution

The Pan Head Chipboard Screw is engineered for secure and reliable fastening in chipboard and various composite materials. Featuring a wide pan head design, it provides increased surface area for superior holding power and structural integrity. With a sharp point and deep thread profile, it ensures easy insertion and a strong, lasting grip, making it an ideal choice for woodworking and furniture assembly projects.

Design Features

Head Style	Pan Head
Thread Profile	Deep Thread
Insertion Features	Sharp Point, Easy Insertion

Applications

Recommended Applications

- Chipboard assembly
- Woodworking
- Furniture manufacturing
- Composite material fastening
