

# Panel Mount LED Indicator Light

This panel mount LED indicator light is designed for diverse industrial applications. It features a bright, energy-efficient LED for clear indication and provides a visual signal for equipment status, alarms, or process monitoring.

## ADDITIONAL IMAGES

## Product Overview

### Compact Industrial Signaling

This panel mount LED indicator light is designed for reliable visual signaling in industrial and commercial environments. Featuring high-luminance LED technology, it provides clear status indication for machinery, control panels, and process monitoring systems. The design includes an ultra-short option for space-constrained installations and supports both AC and DC power supplies for versatile application.

## Technical Specifications

### Available Colors

Red • White • Orange • Green

### Power Compatibility

- AC
- DC

### Mounting Diameters

16mm, 22mm, 25mm

### Current Consumption

20 mA

## Certifications

### Compliance Standards

CQC, UL, TUV, CE, RoHS
