

Panel Mount Rocker Switch with Red Actuator

This rocker switch is designed for panel mounting. It features a red actuator and blade terminals for electrical connection.

Product Overview

Professional Panel Mount Rocker Switch

This H0589 series rocker switch is engineered for reliable panel mounting applications. Featuring a distinctive red actuator for high visibility, it is purpose-built for critical systems including emergency lighting and security equipment. The robust design includes standard blade terminals to ensure secure and efficient electrical connections in professional environments.
