

Paper Production Machine for Industrial Use

This paper production machine is designed for efficient paper production. It features a robust construction and precise engineering for reliable performance.

Overview

Industrial Paper Production Solution

This double head cold glue binder is engineered for high-efficiency paper processing in industrial environments. Designed with a robust construction, it ensures consistent output quality for high-volume production needs. Its compact footprint makes it an adaptable solution for various manufacturing settings, from envelope production to notebook assembly.

Performance Metrics

Binding Speed

60 times/min

Max Binding Speed

Binding Capacity

- Binding Thickness: 0.2-5mm (Single Layer)
- Binding Width: 10-30mm

Technical Specifications

Power Supply	220V/50HZ
Machine Weight	150 kg
Dimensions (L*W*H)	800*600*1200mm

Compatibility & Usage

Common Applications

Paper Bags • Envelopes • Calendars • Notebooks

Compatible Paper Types	Art Paper, Kraft Paper, Coated Paper
Adhesive System	Cold Glue
