

Parabolic Space Heater with Adjustable Head

This space heater uses a parabolic reflector to focus heat for efficient warming. It offers three power settings and an adjustable head for directional control.

Overview

Focused Heating Performance

The SN-NSB-502 Parabolic Heater is a specialized space heating apparatus engineered for efficient, localized warmth. Utilizing a high-performance parabolic reflector, this unit concentrates heat directly where it is needed most, making it ideal for indoor environments. Its user-friendly design includes an adjustable head, stable base, and integrated handle for convenient portability.

Technical Specifications

Heating Technology	Parabolic Reflector
Recommended Usage	Indoor, Household

Design & Features

Adjustment Controls

- Adjustable Heat Settings
- Adjustable Head Angle

Portability	Yes
