

Parabolic Space Heater with Adjustable Head

This parabolic heater provides focused warmth with its infrared radiation technology. It features adjustable power settings of 450W and 900W and includes a safety grill.

Product Overview

Efficient Directional Heating

This parabolic space heater is engineered for focused, efficient warmth, utilizing advanced reflector technology to direct infrared radiation exactly where it is needed most. Its compact design and adjustable head allow for versatile placement in various indoor environments, making it an ideal heating solution for targeted comfort. Safety is prioritized with an integrated protective grill, ensuring reliable performance for household use.

Technical Specifications

Power Source	Electric
Usage Environment	Indoor/Household
Design Features	Parabolic Reflector, Adjustable Head, Compact Design

Safety & Compliance

Safety Features

- Integrated safety grill
- Protective heating element cover
