

Parking Space Barrier with Remote Control

This parking space barrier protects parking spaces from unauthorized use. It features object sensing and easy installation.

Overview

Smart Parking Space Management

This automatic parking barrier provides a reliable solution for reserving and protecting private parking spaces in residential complexes, office buildings, and commercial lots. Designed for both durability and convenience, it features remote control operation for seamless raising and lowering of the barrier. Its robust construction ensures resistance to the elements, while high-visibility markings enhance safety and prevent accidental impacts.

Key Features

Core Features

- Remote control operation
- Object sensing technology
- Waterproof construction
- Crashproof design
- Theftproof security
- Energy-saving operation

Maintenance

Low maintenance

Technical Specifications

Operation Type	Automatic (Remote Controlled)
Installation	Easy installation
Safety Compliance	High Visibility, Object Sensing
