

Parts Washer 12-Gallon Capacity

This parts washer is designed for cleaning and degreasing small to medium-sized parts in automotive and industrial applications. It features a solvent-resistant tank with a recirculating pump and a flexible nozzle for efficient cleaning.

Overview

Professional Parts Cleaning Solution

This 12-gallon parts washer is engineered for efficient cleaning and degreasing of small to medium-sized components in automotive, industrial, and maintenance environments. It features a robust design with a solvent-resistant tank and a recirculating pump system, ensuring consistent performance for demanding tasks. The unit is built for safety and convenience, incorporating a hinged lid to prevent solvent evaporation and a dedicated lower shelf for organized storage.

Technical Specifications

Tank Capacity	12 gallons
Pump Flow Rate	50 GPH
Working Area	30 x 20 inches
Power Voltage	120 V

Features

Included Components

- Recirculating pump
- Flexible nozzle
- Hinged lid
- Parts basket
- Lower storage shelf

Best For

Automotive • Industrial • Maintenance

Construction

Heavy-duty steel frame, Solvent-resistant tank
