

Passenger Elevator

This elevator is designed for transporting passengers in multistory buildings. It ensures efficient and safe vertical movement.

Product Overview

Passenger Elevator System

This passenger elevator is designed to provide efficient and reliable vertical transportation for commercial and residential buildings. Engineered with safety and performance in mind, it ensures a smooth ride quality for passengers while maintaining high operational standards. Its robust construction makes it an ideal solution for modern infrastructure requiring consistent, high-traffic mobility.

Performance Metrics

Rated Load Capacity

1000 kg
Load Capacity

Rated Speed	1.75 m/s
-------------	----------

Safety & Compliance

Certifications	CE, ISO 9001, EN 81
