

PCB Mountable EMI Filter

This EMI filter offers superior performance and is designed for PC board mounting on power lines. It features back mount construction for easy integration.

Product Overview

High-Performance EMI Suppression

These PCB mounting EMI filters offer superior performance and are designed for back-mount installation. Featuring a general-purpose EMI/RFI filter with an integrated IEC connector, these units provide a compact, cost-effective solution for noise suppression. They are available in various schematic configurations and component values to suit diverse application requirements, including a specialized medical-grade version.

Technical Specifications

Rated Current Range

1 A

Minimum Current

15 A

Maximum Current

Available Options

- Medical version available
- Multiple schematic configurations
- Custom component values

Mounting Style

Back Mount (PCB)

Connector Type

IEC Connector

Certifications

Safety Approvals

UL • CUL • VDE • S • CQC • CE
