

PE PP Film Washing Recycling Line 100-300 KG/H

PE and PP Film Crushing, Washing & Drying Line with a capacity of 100-300KG/H. This machinery is designed for processing PE and PP thin films, crushing, washing, and drying them efficiently.

Overview

PE/PP Film Recycling Solution

This specialized recycling line is engineered for the efficient processing of PE and PP thin films. The system integrates a comprehensive sequence of machinery including feeding, crushing, washing, dewatering, and drying stages. Designed to handle throughputs of 100-300 kg/h, it transforms waste film into clean, dry plastic flakes suitable for high-quality recycling applications.

Processing Capacity

300 KG/H
Max Capacity

100 KG/H
Min Capacity

Technical Specifications

Process Stages

- Feeding
- Crushing
- Washing
- Dewatering
- Drying

Output Quality

Clean Flakes • Dry Flakes

Material Compatibility

PE, PP, Thin Film
