

Peripheral Water Pump

This peripheral pump is designed to handle fluids up to 80 and ambient temperatures up to 40 . Featuring a cast iron pump body, aluminum motor housing, and brass impeller, it is engineered for durability and efficient performance.

Overview

SQB Series Peripheral Pump

The SQB series peripheral pump features a specialized impeller with numerous radial blades, optimized for pumping clean water and chemically non-aggressive liquids. Designed for reliability and economy, this pump offers a simple, robust construction suitable for various domestic and industrial fluid transfer needs. It is an ideal solution for water supply from wells or pools, pressure boosting systems, and garden irrigation.

Technical Specifications

Pump Type	Peripheral Pump
Series	SQB Series
Compatible Fluids	Clean Water, Chemically Non-aggressive Liquid
Impeller Design	Peripheral with radial blades

Applications

Primary Applications

- Water supply from wells
- Water supply from pools
- Pressure boosting systems
- Garden sprinkling
- Washing booths

Installation & Safety

Installation Requirements

Covered Area • Weather Protected
