

Peristaltic Pump Liquid Filling Machine

This semi-automatic machine dispenses liquids using a peristaltic pump for controlled filling. It is designed for accurate volume control in various applications.

Product Overview

Precision Peristaltic Filling

This semi-automatic liquid filling machine utilizes advanced peristaltic pump technology to deliver precise and controlled dispensing for a wide variety of liquids. Designed for versatility, it is suitable for pharmaceuticals, chemicals, oils, cosmetics, and food products. Its high-precision capabilities make it an ideal solution for laboratory settings and small to medium-scale production environments.

Technical Specifications

| | |
|-------------------|------------------|
| Filling Mechanism | Peristaltic Pump |
| Operation Mode | Semi-automatic |
| Model ID | BT300-1F |

Application & Usage

Compatible Liquids

- Non-granulated liquids
- High viscosity liquids
- Low viscosity liquids

Suitable Industries

Pharmaceuticals, Chemicals, Oils, Cosmetics, Food Industry, Laboratory

Features

Interface Features

LCD Digital Display • Parameter Setting • Performance Monitoring
