Overview

Compact Personal Air Purification

This portable air purifier is engineered for small spaces like offices, bedrooms, or vehicles. It features a high-efficiency HEPA filtration system capable of removing formaldehyde, PM2.5, smoke, and dust particles. With a built-in plasma generator and 3-level wind speed control, it ensures effective sterilization and air quality management in a compact, user-friendly design.

Technical Specifications

Power Consumption	6 W
Input Voltage	DC 5V
Clean Air Delivery Rate (CADR)	20 m ³ /h
Product Dimensions	Dia 10.5 x 21.2 cm

Features & Functionality

Key Features

- USB Powered
- Mobile phone charging output (car use)
- Quiet operation
- Built-in timer
- Hanging strap for versatile placement

Filtration Technologies	True HEPA Filter, Plasma Generator, Activated Carbon
Wind Speed Settings	3
