

Personal Ceramic Space Heater

This compact ceramic space heater is designed for personal use. It includes an adjustable thermostat, multiple heat settings, overheat protection, and a cool-touch exterior.

Product Overview

Compact Personal Comfort

This portable ceramic space heater is engineered for efficient supplemental warmth in small to medium-sized indoor environments. With its user-friendly adjustable thermostat and versatile heat settings, it offers precise climate control for office or residential desks. The unit emphasizes safety through integrated overheat protection and a cool-touch exterior design, making it a reliable solution for personal heating needs.
