

Personal Electric Table Fan

This is a compact electric fan designed for personal cooling. It features adjustable speed settings and is suitable for use in homes, offices, or small spaces.

Product Overview

Compact Personal Cooling Solution

This personal electric table fan is designed for efficient, localized air circulation in compact environments. Featuring a multi-blade impeller system housed within a protective safety grill, it provides consistent airflow while maintaining a small footprint. Ideal for office desks, bedside tables, or small living spaces, this fan offers adjustable speed settings to suit your comfort needs.
