

Personal Transportation Tricycle

This tricycle is designed for personal transportation. It features an enclosed body with doors, windows and headlights.

Product Overview

Innovative Personal Transportation

This enclosed three-wheeled vehicle offers a secure and comfortable alternative for personal urban mobility. Designed with a robust car-like body, it features doors, windows, and headlights to ensure protection from the elements while providing a reliable mode of transit. It combines the agility of a tricycle with the comfort and structure of a compact vehicle.
