Product Overview

Professional Grade Wire Harness Solution

This PET cloth wire harness tape is engineered with a polyester nonwoven fabric backing and a high-performance rubber pressure-sensitive adhesive. It is specifically designed for the automotive industry to effectively wrap and protect wire harnesses. The tape offers superior abrasion resistance and durability, ensuring consistent performance in demanding electrical and industrial environments.

Technical Specifications

Backing Material	Polyester nonwoven fabric
Adhesive Type	Rubber pressure-sensitive adhesive

Performance Features

Key Benefits	Abrasion Resistant, Anti-aging, Low Odour, Consistent Unwinding Force, Flexible, Conformable
--------------	--

Applications

Primary Applications

- Automotive wire harness wrapping
- Electrical insulation
- Wire bundling
- Industrial cable protection
- Aerospace applications

Application Compatibility

Manual Wrapping • Automated Wrapping
