

PET Preform Mold for Bottle Manufacturing

This high-precision PET preform mold is designed for efficient production of PET preforms used in beverage bottles and containers. It features a multi-cavity design for increased output and an optimized cooling system for reduced cycle times.

Product Overview

High-Precision PET Preform Mold

This high-precision PET preform mold is engineered for the efficient, high-volume production of PET preforms used in beverage bottles and containers. It features a robust multi-cavity design to maximize output and an optimized cooling system that significantly reduces cycle times. Built for durability, this mold ensures consistent performance in demanding manufacturing environments.

Technical Specifications

Design Features

- Multi-cavity design for increased output
- Optimized cooling system
- Durable construction

Manufacturing Suitability

High-Volume Production, Beverage Packaging, PET Container Manufacturing

Key Metrics

Performance Highlights

1 High

Cycle Time Optimization

1 Multi-Cavity

Output Capacity
