

Petrochemical Industrial Facility

This petrochemical industrial facility facilitates the transfer and handling of petrochemical products. It features a cargo ship docked at a pier connected to onshore processing and storage equipment.

Facility Overview

Industrial Petrochemical Infrastructure

This petrochemical industrial facility is designed for the efficient handling and transfer of liquid bulk products. The site features integrated maritime logistics capabilities, including a dedicated pier equipped with industrial loading arms and pipeline infrastructure. It is optimized for the seamless connection between marine transport vessels and onshore processing or storage units.

Operational Capabilities

Key Infrastructure

- Maritime docking pier
- Industrial loading arms
- Pipeline transfer network
- Onshore storage tanks
- Processing infrastructure

Logistics Type

Maritime Transfer, Bulk Storage, Pipeline Distribution
