

Petrol Service Station

This is a modern petrol service station with a red roof and white support columns. It provides a functional space for vehicle refueling and related services in urban and suburban areas.

General Overview

Modern Petrol Service Station Infrastructure

This petrol service station offers a modern, high-visibility design suitable for urban and suburban retail fuel environments. Featuring a robust structural frame with aesthetic red roof panels and durable white columns, the facility is engineered for professional operation. The layout ensures efficient lighting and clear site visibility, supporting high-volume throughput and enhanced customer safety.

Design and Architecture

Structural Components

- Reinforced support columns
