

Petroleum Processing Equipment

Specialized machinery used in the refinement and treatment of crude oil. It processes natural gas into various petroleum-based products.

石油制品	汽油 沥青 溶剂油 渣油	柴油 重油 MTBE	润滑油 燃料油 组分油	液化气 石脑油 糠醛油

Overview

Comprehensive Petroleum Processing Solutions

This range of petroleum processing equipment is designed to handle a diverse array of refined products. The machinery supports the efficient management, storage, and processing of essential energy outputs including gasoline, diesel, and lubricating oils. Built to meet industrial standards, these solutions ensure the reliable handling of complex petrochemical components such as MTBE and naphtha.

Product Range

Refined Product Portfolio

- Gasoline
- Diesel
- Lubricating Oil
- Liquefied Gas
- Asphalt
- Heavy Oil
- Fuel Oil
- Solvent Oil
- MTBE
- Component Oil
- Residual Oil
- Naphtha
- Side-line Oil

Key Categories

Energy, Petrochemical, Industrial Fuel, Refining
