

PEX Pipe Coupling

This brass coupling connects two PEX pipes of equal diameter. Its push-fit design ensures quick installation without soldering or special tools.

Overview

Professional PEX Coupling Solution

This high-quality brass coupling is engineered to provide a secure and leak-free connection between two PEX pipes of the same diameter. Designed for efficiency, its push-fit mechanism allows for rapid installation without the need for specialized tools, soldering, or adhesives. It is a versatile choice suitable for both potable water supply and hydronic heating systems.

Technical Specifications

Key Features

Corrosion Resistant • Leak-Free • Tool-Free Installation

Material	Brass
Installation Method	Push-fit

Compatibility

Compatible Tubing	PEX-A, PEX-B, PEX-C
-------------------	---------------------

Applications

Suitable Systems

- Potable water systems
- Hydronic heating systems
