

Pharmaceutical Production Equipment

This equipment is designed for pharmaceutical production. It ensures efficient and precise manufacturing processes.

Product Overview

Pharmaceutical Production Equipment

This industrial-grade pharmaceutical production equipment is designed to meet the rigorous demands of large-scale manufacturing environments. Engineered for precision and efficiency, it supports essential processes within the pharmaceutical supply chain. The system is built for durability and reliable performance in high-output facilities.

Compliance & Standards

Certifications

ISO 9001, GMP Compliant

Operational Metrics

Production Capacity

500 pcs/h
Units per Hour

85 %
Efficiency Rate

Technical Specifications

Construction Materials

- Stainless Steel 316L
- Food-Grade Silicone Seals
- Industrial Grade Aluminum
