

Pipe Grooving Machine for Plastic-Lined Pipes

This pipe grooving machine is designed for preparing plastic-lined pipes. It creates precise grooves for mechanical joining systems, ensuring accurate and consistent results.

Product Overview

Professional Pipe Grooving Solution

This pipe grooving machine is a robust and reliable tool engineered for creating precise grooves on pipes. Designed for versatility, it is suitable for both on-site installation and workshop applications. It serves as an essential component for plumbing, HVAC, and various industrial piping projects requiring mechanical joining systems.

Technical Capabilities

Processing Parameters

Pinch roller, Knurl roller

Application Compatibility

Compatible Pipe Types

- Plastic-lined pipes
