

Pipe Reducers

These pipe reducers connect pipes of varying diameters. They ensure a secure transition and maintain consistent flow in plumbing and industrial systems.

Product Overview

Industrial Concrete Pump Reducers

These high-performance pipe reducers are essential components for concrete pumping systems, engineered to facilitate seamless transitions between different pipe diameters. Available in multiple configurations including F-M, M-HD, HD-HD, and G-G, these parts ensure efficient material flow across various pressure requirements. Built for durability, these reducers offer options for hardened, heat-treated, or weld-hardened surfaces to withstand abrasive concrete flow.

Technical Specifications

Available Reducer Sizes

- 6"x5"x63"
- 6"x5"x47"
- 5"x4"x53"
- 5"x4"x36"
- 5"x4"x27"
- 5"x4"x15"
- 5"x3"x36"
- 4"x3.5"x12"
- 4"x3"x36"
- 4"x3"x12"
- 4"x2.5"x40"
- 4"x2"x40"
- 3"x2.5"x36"
- 3"x2.5"x28"
- 3"x2"x36"
- 3"x2"x28"
- 2.5"x2"x36"
- 2.5"x2"x28"
- 2"x1.5"x15"
- 1.5"x1.25"x15"

Wall Options

Standard Wall • Double Wall

Construction Features

Heat-Treated, Inner Hardened, Weld Hard Faced, Double Wall Available
