

Piston Kit with Rings, Pin, and Circlips

This piston kit includes a piston, rings, a pin, and circlips. It is suitable for small engines and pumps, sealing the combustion chamber and transferring heat.

Product Overview

High-Performance Piston Assembly Kit

This comprehensive piston kit is engineered for small engines and pump applications, providing a complete solution for cylinder maintenance. The assembly features a durable aluminum alloy piston paired with precision-engineered rings designed for optimal combustion chamber sealing and efficient heat transfer. Included in the set are the piston pin and securing circlips, ensuring a reliable connection to the connecting rod and preventing lateral drift during operation.

Technical Specifications

Included Components

- Piston
- Piston Ring Set (including chrome/scrapper rings)
- Piston Pin (Wrist Pin)
- Circlips (Piston Pin Retainers)

Key Features

Combustion Chamber Sealing • Heat Transfer Optimization • Secure Pin Retention

Material

Aluminum Alloy

Application & Compatibility

Suitable For

Small Engines, Pumps
