

Plain Trolley for Beam Mounting

This plain trolley facilitates the horizontal movement of heavy loads when mounted on a beam. It is constructed from robust steel and features sealed bearings for smooth operation and reliable performance.

Overview

Heavy-Duty Plain Trolley

The Plain Trolley for Beam Mounting is a robust, industrial-grade tool engineered for the efficient horizontal movement of heavy loads. Constructed with durable steel and equipped with sealed bearings, it ensures smooth operation and long-term reliability in demanding environments. Its adjustable width design allows for seamless integration with various beam sizes, significantly enhancing productivity and safety during material handling tasks.

Technical Specifications

Material	Robust Steel
Operation	Manual Plain Trolley
Bearing System	Sealed Bearings
Beam Compatibility	Yes

Key Features

Benefits	Heavy-Duty Construction, Smooth Operation, Adjustable Width, Industrial Grade
