

Plain Trolley - GCT 620 Series

The GCT 620 Series Plain Trolley is a material handling solution for industrial applications. It is engineered for the movement of heavy loads along a horizontal beam.

Overview

Industrial Material Handling Solution

The GCT 620 Series Plain Trolley is a robust and reliable material handling solution engineered for industrial environments. Designed for the smooth and efficient movement of heavy loads along horizontal beams, this trolley features durable steel construction that ensures long-term resistance to wear and tear. It offers manual operation for precise control, making it an ideal companion for chain blocks and various lifting devices in warehouses, workshops, and construction sites.

Technical Specifications

Compatible Equipment

- Chain blocks
- Lifting devices

Operation Type	Manual
Material	High-quality steel
Primary Application	Material Handling, Load Positioning, Horizontal Beam Transport

Key Features

Design Benefits

Compact Design • Easy Installation • Wear Resistant • Precise Control
