Overview

Professional Planer & Thicknesser

This combination machine is a versatile solution for woodworking, designed to handle both surface planing and thickening operations with precision. Built for stability and consistent material removal, it features adjustable infeed and outfeed tables to accommodate various workpiece sizes. It is an essential tool for achieving smooth, flat surfaces and uniform board thickness in professional and workshop environments.

Technical Specifications

Motor Power

1600 W

Motor Power

Voltage/Frequency

230V~50Hz

Cutterhead Speed

8500 RPM

Features & Safety

Operational Features

- Integrated Dust Collection Port
- Adjustable Infeed and Outfeed Tables
- Multi-knife Cutterhead
- Robust Construction

Safety Features

Emergency Stop Switch, Blade Guard
