Overview

High-Efficiency Plastic Bag Production

This versatile plastic bag production machine is engineered for the reliable manufacturing of vest bags and flat bags. It features a frequency converter on the main motor for significant energy savings and precise operational adjustments. With advanced computer control and stable photocell tracking, the system ensures accurate sealing and cutting with minimal error rates.

Technical Specifications

Max Sealing Width	800 mm
Max Cutting Length	999 mm

Performance

Production Speed

140 pcs/min

Max Speed

40 pcs/min

Min Speed

Features

Key Machine Features

- Frequency converter for power saving
- Stable photocell tracking for alignment
- Advanced computer control system
- Adjustable sealing and cutting parameters

Applications

Suitable Bag Types

Vest Bag, Flat Bag
