

Plastic Cup Crushing Machine

This heavy-duty machine efficiently reduces the volume of plastic cups. It features a robust steel frame for stability and hardened steel blades for effective crushing.

Product Overview

Efficient Plastic Waste Management

This heavy-duty crushing machine is specifically engineered for reducing the volume of plastic waste, including waste thread, waste film, and side slitter materials. It features a robust steel frame construction designed for stability and long-term durability in industrial environments. With its powerful motor and hardened steel blades, it provides an effective, cost-efficient solution for recycling centers and food processing facilities.

Technical Specifications

Motor Power

15 kw

Motor Power

Working Width

650 mm

Crushing Customization

Adjustable output diameter via replaceable filter screens

Safety & Design

Safety Features

Protective Covers, Emergency Stop Button, Hardened Steel Blades

Build Quality

Robust steel frame
