

Plastic Door and Cabinet Damper

This plastic damper is designed for doors and cabinets. It functions as a buffer to prevent slamming and reduce noise.

Product Overview

Soft-Close Cabinet Damper

This plastic door and cabinet damper, model C-31, is designed to provide a soft and quiet closing experience for various furniture applications. Engineered for durability, the damper features high corrosion and ageing resistance to ensure long-lasting performance in demanding environments. It is an ideal solution for cabinets and cupboards, effectively preventing slamming and reducing noise.
