

Plastic Film Blowing Machine

This high-performance machine is designed for efficient production of polyethylene film. It includes a robust structural frame, advanced control panel, and integrated cooling system for optimal film quality.

Overview

High-Performance Film Production

This high-performance plastic film blowing machine is engineered for the efficient production of polyethylene film. It features a robust structural frame and an advanced control panel for precise, reliable operation. With an integrated cooling system and multi-roller processing, the machine ensures consistent film thickness and width for professional-grade output.

Technical Specifications

Key Features

- Robust structural frame
- Advanced control panel
- Integrated cooling system
- Multiple rollers for uniform processing
- Integrated winding mechanism

Applications

Polyethylene Film, Plastic Film Manufacturing

Performance

Quality Control

Consistent Thickness • Uniform Width
