

Plastic Grated Drain for Medical Equipment

This black plastic drain is designed for efficient drainage in medical and industrial settings. Its grated top prevents debris from entering the drain system, ensuring smooth operation.

Product Overview

High-Performance Drainage Solution

This specialized plastic grated drain is engineered for demanding environments such as pharmaceutical equipment and medical machinery. Its durable, glossy plastic construction ensures long-term reliability, while the optimized grated top design facilitates efficient liquid flow while effectively preventing debris from entering the drainage system. The integrated flange design allows for secure mounting, making it an ideal component for industrial plumbing and fluid management systems.

Technical Specifications

Suitable Applications

- Pharmaceutical Equipment
- Medical Machinery
- Industrial Plumbing
- Fluid Management Systems

Drain Configuration

Cup-Shaped Body • Debris Filtration

Material

Durable Industrial Plastic

Design Features

Grated Top, Flange Mount, Curved Drainage Slots, Glossy Finish
