

Plastic Injection Molding Machine

This injection molding machine is designed for producing plastic parts with precision and efficiency. It offers precise control over injection parameters, ensuring consistent part quality and easy customization.

ADDITIONAL IMAGES

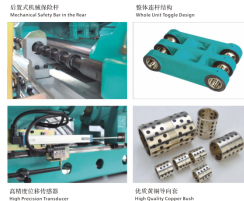

Overview

High-Performance Injection Molding Solution

This industrial-grade injection molding machine is engineered for precision, consistency, and energy efficiency across a wide range of plastic materials including engineering plastics. Featuring a modular, robust architecture, it integrates advanced hydraulic and electronic control systems to ensure repeatable quality and high throughput. The unit is optimized for diverse sectors such as automotive, consumer goods, and electronics, offering reliable performance with simplified maintenance requirements.

Clamping System

锁模机构 CLAMPING UNIT

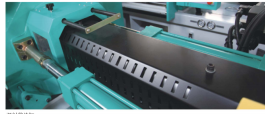

The robust clamping unit features a whole-unit toggle design and high-precision position feedback for reliable mold movement.

Clamping Unit Design

Mechanical Safety Bar, Whole Unit Toggle Design, High-Precision Transducer, Copper Bushings

Injection System

注射机构 INJECTION UNIT

平衡双缸
Balanced Twin Cylinder Injection System

注射自动润滑
Injection Lubrication System

高精度线性导轨
High-Precision Linear Guide

陶瓷加热器
Ceramic Heater

Features a balanced twin cylinder injection system and precision linear motion guides for consistent material delivery.

Injection Technology

- Balanced Twin Cylinder Injection System
- Automatic Injection Lubrication System
- Linear Motion Guides
- Ceramic Heater Temperature Control

Hydraulic System

液压控制系统 HYDRAULIC SYSTEM

自动润滑装置
Auto Lubrication Device

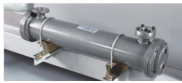

进口液压泵
Imported Hydraulic Pump

进口液压软管
Imported Hydraulic Hoses

自吸式过滤器
Suction Filter with Check Valve

高性能油冷却器
100% Oil Cooler

High-efficiency hydraulic system including a dedicated oil cooler and high-quality filtering mechanisms.

Hydraulic System Highlights

- Auto Lubrication Device
- Imported Hydraulic Pump
- Imported Hydraulic Hoses
- Suction Filter with Check Valve
- 100% Oil Cooler

Electrical System

Precision electrical controls for monitoring pressure, flow, and injection parameters.

Control System Specifications

- Digital Pressure and Flow Voltmeter
- Advanced Inverter Control
- Integrated Control Cabinet
- User-friendly Interface
