

Plastic Mannequin Blow Molding Machine

This blow molding machine is designed for the efficient production of plastic mannequins, ensuring consistent quality. It features a hydraulic system for mold clamping, a precise extrusion head, and a programmable logic controller (PLC) for automated operation.

ADDITIONAL IMAGES

Overview

High-Efficiency Mannequin Production

This industrial blow molding machine is engineered specifically for the efficient production of high-quality plastic mannequins. Featuring robust construction and advanced control systems, it ensures consistent material distribution and structural integrity for every unit produced. The system is designed for reliability in demanding manufacturing environments, offering precise control over cycle times and temperature regulation.

Technical Specifications

Max Container Capacity	60 L
Clamping Force	320 kN
Platen Size	900*880mm
Motor Power for Pumps	15 kW
Air Pressure	1 MPa

Features & Safety

Key Features

- Programmable Logic Controller (PLC) for automation
- Material feeding system
- Mold cooling system
- Finished product ejection mechanism
- Precise extrusion head

Safety Systems	Light curtains, Emergency stop buttons
