

Plastic Pipe Cutter

This plastic pipe cutter is designed for cutting various types of plastic pipes, including PVC, CPVC, PP-R, PE, and PEX tubing. It features a sharp, durable blade made of high-carbon steel for clean and precise cuts.

Overview

Professional Plastic Pipe Cutter

This high-performance plastic pipe cutter is engineered for precision and durability, featuring a high-carbon steel blade that ensures clean, effortless cuts. Designed with a robust ratchet mechanism, it provides significant leverage to handle various pipe materials including PVC, CPVC, PP-R, PE, and PEX. The ergonomic handle design promotes a secure and comfortable grip, making it an essential tool for plumbing and irrigation professionals.

Technical Specifications

Cutting Capacity

1.25 inch

Maximum Diameter

0.125 inch

Minimum Diameter

Blade Material	High-carbon steel
Compatible Materials	PVC, CPVC, PP-R, PE, PEX

Features

Design Features

- Ergonomic handle for secure grip
- Durable construction
- Clean cutting action

Mechanism	Ratchet mechanism for increased leverage
------------------	--

Applications

Primary Applications

Plumbing • Irrigation • General Construction
